Thesis & Publications

Thesis: Design and Analysis of a Broadband Metamaterial Absorber Encompassing the Visible Solar Spectrum,

Objectives: To design and simulate a broadband metamaterial absorber with hexagonal shaped resonator at Visible frequency terahertz resonance frequency. and simulate a broadband metamaterial absorber with hexagonal shaped resonator at Visible frequency. and attain a transmission and reflectance of the absorber.

Conference: Design and analysis of a broadband wide-angle metamaterial solar absorber for the visible spectrum

Abstract: The features of metamaterials are determined by the material's structural order, which allows them to be used in many different fields such as optical sensors, light detection, photon trapping, invisibility cloaking, MRI, and photovoltaic cells. It presents a metamaterial-based ultrathin absorber composed of three layers of substances (tungsten, epoxy resin, and tungsten) designed for absorbing visible solar radiation using Finite Integration Technique. The absorber exhibits an absorbance in the vicinity of unity across a wavelength range of 380-780nm. In addition to a maximal absorption of 99.996% at 490.62nm, the proposed design demonstrates an average absorption of 95.24% at the respective wavelengths.

Work Experience

Junior Executive

Summit Corporation,

Summit Centre, , Dhaka, Bangladesh

Responsibilities: Supporting administrative tasks by preparing documents, filing, and handling data entry. | Organizing appointments, meetings arrangement, and coordinating with other departments to ensure smooth daily operations. | Receiving International & Local calls, managing incoming and outgoing mail and emails, ensuring prompt and accurate distribution. | Providing information, answering questions, and resolving inquiries to ensure a positive visitor experience.

Communication Officer

Cloud Company, Mirpur- 11, Dhaka

Responsibilities: Communication with marketing team, | Communication with clients and employees, | Email writing, providing clients to company, meetings arrangement, providing work details to employees of each sector.

Skills : MS Word/ Excel/ PowerPoint | Teaching/ Training | VLSI | MATLAB | Python/HTML/CSS | Customer Service | Research
